AVATA

eLync Enterprise Integration Platform

AVATA's eLync Enterprise Integration Platform offers a solid integration platform to help you easily connect ERP systems to Oracle Cloud Applications. Built on Oracle technology, eLync provides user-friendly, pre-configured cloud adapters that make integration possible in days as compared to several weeks using traditional technologies. eLync's pre-built tools reduce the cost and complexity of the integration process for our customers.

eLync
### ENTERPRISE INTEGRATION PLATFORM

SOLUTION BENEFITS

➡ Reduces the time, cost and the complexity of integration projects

➡ One single data repository

➡ Store different versions for scenario management

➡ Data can be updated in multiple ways

➡ Excel integration (up and download)

➡ Email support for rapid error tracking for processes and trapping data errors

➡ Supports both inbound and outbound integration with Cloud Application

The Challenge

Organizations today struggle to integrate their legacy systems and on-premise tools that operate in a loosely coupled IT infrastructure. Establishing a robust integration, real-time analysis and monitoring is cumbersome for most solutions. Often, integration becomes the biggest challenge during the implementation of any SaaS application due to complexity, cost and long timelines.

AVATA's eLync Solution

AVATA created eLync to mitigate these challenges. The eLync Enterprise Integration Platform utilizes modern technology to ensure simplified, reliable and secure connectivity. eLync is a user-friendly platform with pre-configured adapters which allow you plug-in to on-premise legacy tools, ERP tools or Flat files and import your data to the cloud. Data is pulled into our web-based eLync platform where it goes through a validation process and publishes the data to the cloud where it can interface with Oracle Cloud Applications.

eLync Applications

Master Data Management (MDM) Wizard

MDM Wizard is the cornerstone of eLync that provides a comprehensive toolset that consolidates, cleanses, augments and validates corporate master data or transactional data and synchronizes with disparate business applications.

Migrating Demantra to DM Cloud

AVATA's Demantra to DM Cloud Express is a pre-configured tool that offers a quick, easy and cost-effective way to migrate existing data from VCP Demantra to Oracle Demand Management Cloud utilizing eLync as well as our standard proven Methodology for rapid migration.
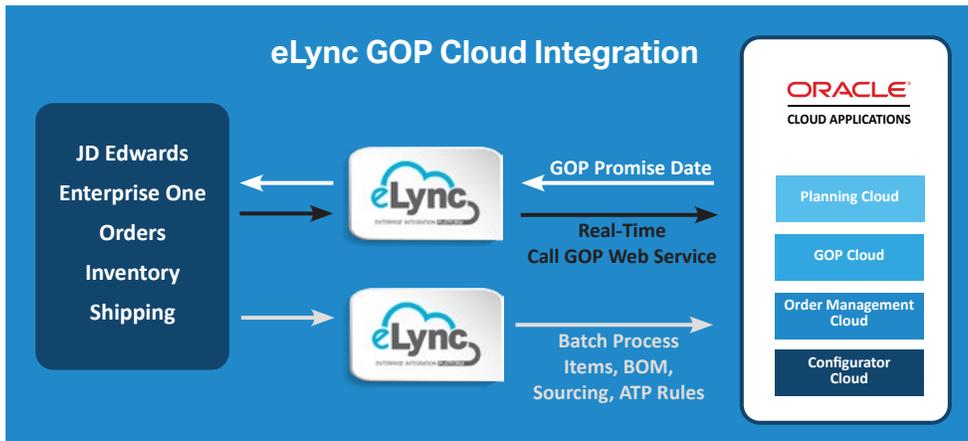

Cloud Adapters

AVATA's eLync platform offers various cloud adapters that integrate Oracle Cloud to legacy ERP applications including JDE and EBS.

S&OP Express Cloud Integration

eLync is the only automated integration platform currently available to interface Oracle's S&OP Cloud with legacy planning data systems.

Improve GOP Cloud with eLync

eLync can provide real-time integration to calculate the realistic commit dates from Oracle Cloud and interface back to sales orders.

Success Stories

At Cleveland Golf, AVATA utilized eLync to provide inbound and outbound integration between JD Edwards, Oracle Supply Planning Cloud and Oracle GOP Cloud. This integration allowed the company to meet very demanding customer expectations by providing accurate promise dates based upon planned supply across the supply chain.

As a result of their Cloud migration, Cleveland Golf not only achieved significant improvements in providing accurate promise dates, but also improved backlog management, Perfect Order KPI, and reduction in non-value added work by the planning team.

"We chose AVATA and the Oracle Planning solution because AVATA showed us how some of our long time planning issues would be solved. AVATA's attention to our business requirements gave us confidence that our project would be successful."

- Charles Chamberlain
Director IT, Cleveland Golf

AVATA

AVATA is a leading strategic partner of Oracle and is recognized for its global capabilities in helping companies solve critical business challenges through people, process and technology. We offer the unique blend of real-world industry experience, best practices, and software expertise that sets us apart from pure system integrators. Leveraging Oracle SCM and ERP Cloud solutions, we provide our clients with a strategy that fits their organization and competitive processes that differentiate them in their respective markets, and successfully deliver rapid improvements impacting bottom-line performance.
